

RE[⚡]UP LOAN PROGRAM

Resilient Energy Upgrades To Power Louisiana Homes

At Finance New Orleans, our goal is to make resilient home improvement financing more accessible to all Louisiana residents.

Through the Residential RE-UP Program, homeowners can access flexible, no-collateral loans to complete energy-efficiency, solar, and critical home repair projects.

There is no minimum credit score requirement, and approval focuses on your ability to repay – not on home equity.

To protect homeowners and ensure quality work, every contractor in the program is carefully screened, trained, and supported so your project is completed safely, fairly, and successfully.
